

# COMMUNITY SERVICE AWARD

**GROWN**NYC

Created in 1970, GrowNYC empowers all New Yorkers to pursue a clean and healthy environment through environmental and food access programs that transform communities block by block. Serving 3 million people annually across the five boroughs, the nonprofit prioritizes services to areas that need it most, working to ensure that all city residents have the same access to fresh food, green space, and clean air.

Our programming includes operating Greenmarkets and other food access points, building and maintaining community and school gardens, providing hands-on environmental education to learners of all ages, and conservation resources like textile recycling and compost. Great cities are made better when all citizens live healthy and enriching lives.
